

# Central Texas Lions KidSight Vision Foundation

The first few years of a child's life are critical in the development of good vision. Children in this age group are difficult to test, are not aware they can't see well, and often can compensate for their vision issues so that even parents and pediatricians often cannot tell their is a vision problem.

**1 in 4 children suffer from a vision problem.**

**1 in 20 children are at risk for permanent vision loss from disorders like amblyopia if not detected early.**

**Since 80% of a child's learning is visual, early detection of undiagnosed vision problems is crucial for a child to achieve their full potential in life and learning. A child cannot learn what they cannot see.**

## Lions KidSight Can Help!

Early childhood vision screening can help in the detection of undiagnosed vision problems as early as 6 months of age.

Vision screening does not replace a complete eye examination by an ophthalmologist or optometrist.

**Complete Eye Exam Recommended**

**SPUT**

**Vision Screening Summary**

SUBJECT: Sample  
 SCREENING: 10/13/2012 9:06 am ID: 01018 M AGE: 3y  
 FIRST NAME:  
 LAST NAME:

**POTENTIAL CONDITION**

- Myopia (D33) (near-sighted)
- Hyperopia (D00-000) (far-sighted)
- LASX (L04) (eye alignment)
- Glau (E00-000) (eye pressure)
- Anisometropia (unequal power)

**RIGHT EYE** IN FOCUS: +0.25, +1.00, -2.00 @14"

**LEFT EYE** IN FOCUS: -2.25, -1.00, -2.75 @14"

**BOTH EYES** IN FOCUS: myopia, hyperopia, astigmatism, glau (eye)

**PEDIAVISION**  
SpotVisionScreening.com

## Spot it Early, Treat it Early

As quickly as it takes to snap a photo, the PediaVision Spot detects the indication of these vision issues:

- Near-sightedness (myopia)
- Far-sightedness (hyperopia)
- Unequal refractive power (anisometropia)
- Blurred vision, eye structure problem (astigmatism)
- Pupil size deviations (anisocoria)
- Eye misalignment (strabismus)

In just seconds, Spot provides a comprehensive, reliable analysis that enables informed decision making about the need for follow-up diagnosis.
